*Passmark.com does "benchmark testing" to make it easier to compare the power of all the various processors available in the market today. With cryptic, meaningless names and varying operating frequencies as well as the number of processor cores it can be difficult to know which CPU is the best value. The Passmark scores for all the systems we sell are shown to make it easier for our clients to compare the units we have to offer and see how the performance stacks up from one to another. You can look up your current CPU at http://www.cpubenchmark.net/cpu_list.php to compare your CPU against our new ones
