****Passmark.com** does “benchmark testing” to make it easier to compare the various processors available in the market today. With cryptic names and varying operating frequencies as well as the number of processor cores it can be difficult to know which CPU is the best value. We use Passmark’s numbers and choose the CPUs that give you the best bang for your buck. You can look up your current CPU at http://www.cpubenchmark.net/cpu_list.php to compare it against new ones. Passmark Scores are subject to change with further testing.
